Art Unit: 2837

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-26 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-16 of U.S. Patent No. 6,540,045. Although the conflicting claims are not identical, they are not patentably distinct from each other because the method steps of the instant application are the same as claimed in the patent except stated in different wording and also made broader. For example, comparing claim 1 of the instant application and claim 1 of the patent, the differences are the following:

A phrase "with at least one venting passage extending essentially substantially over the length of said ear plug device between regions respectively facing the ear drum and the outer environment" is inserted into claim 1 of the instant application. This phrase described an ear device as stated in claim 1 of the patent "individualized for individuals".

Another phrase "shape of said venting passage" in claim 1 of the instant application replaces "shape of each individual's area of application for a hearing device" in claim 1 of the patent.

Further, "parts" in claim 1 of the instant application replaces "individual shell" in claim 1 of the patent.

The above modification of languages does not make the method in the instant application a different method of making an ear device from the claim of the patent.

Regarding the rest of the claims, the claimed method steps of the instant application are the same as the method steps of the patent.

3. Claims 1-26 would be allowable if a terminal disclaimer is timely submitted.
